

SunSense – Coarse Sun Sensor

Description:

SunSense, our advanced sun sensor, gives you a wide sensing range and a desirable operational temperature, delivering precision and reliability. Its compact design makes it an ideal fit for any CubeSat configuration. Featuring a low shut-down current consumption, SunSense ensures efficient energy management. SunSense's sensor includes on-board temperature compensation. It also includes a low-noise amplifier and a 16-bit ADC. It comes with a hard anodised AL 6061 enclosure, making it mountable externally on all solar panels.

	Parameter	Value
Performance	Interface Type	Digital
	FOV (Field of View)	110°
	Range	0 to 228 kLux
	Output resolution	0.0034 lux/counts
	Operational temperature	-40° to 110°C
Mechanical	Dimensions (including housing)	30mm x 22mm x 7.6mm
	Mass	~15 g
	Connector	4-pin Molex pico-blade
Electrical	Shutdown current consumption	0.5 μ A
	Operating Voltage	2.5V to 3.3V (nominal)
	Communication Interface	I2C
